■ About Corporate & Government Services

As the complexity of risk expands at an ever-increasing pace, the industry demands an almost constant stream of innovative thinking.

Northwood & Associates Corporate & Government Services provides high-level risk management and strategic anti-fraud consulting to leaders operating at the intersection of blue chip corporate clients, pre-eminent law firms, all levels of government departments and the insurance industry. Working with senior level management, Northwood & Associates assists clients in becoming more competitive by making better, more informed strategic and tactical decisions with regards to fraud management issues. We offer our client's insightful analysis of today's changing business climate and how it affects them.

By combining our analytical talents with a deep understanding of the industries we serve and the broader political and policy context, we have earned a reputation for offering business leaders actionable recommendations and solutions to the challenges they face. We are set apart by our dedication to quality, timeliness and pragmatism which support prudent corporate governance and enhance commercial capability with valuable intelligence.

Northwood & Associates conducts both investigative inquiries and surveillance work on behalf of many of Canada's largest insurers, self-insured corporations and leading law firms.

Northwood & Associates has expanded its capabilities across Canada and provides a national platform for our service offerings. With this expansion, we are now better equipped to serve our clients' needs.

Northwood & Associates' technology solutions (such as CaseTrak, a web-based case management system) secured it the position as the pioneer of new and innovative fraud-fighting strategies to meet the changing needs of the insurance industry.

We have worldwide resources, streamlined workflows and provide our clients with the most comprehensive fraud-fighting technology and customer service system available in the market today.

Our clients have access to unparalleled industry knowledge, expert consulting and customized business models, all backed by extensive global investigative resources and logistics experience.
